Implications and Response

- Highly interconnected prescribers in the network's core were clinicians of **CCH's chronic pain management center**. Their model of chronic pain management may be part of a national solution.
- Prescribers in the network's periphery and specialties like emergency medicine and procedural specialties were vulnerable to exposing patients to high daily dose opioids through discoordinated prescriptions.
- **Cook County Department of Public Health** targeted public health detailing toward prescribers among procedural specialists.
- Illinois legislation (SB 1607) mandating prescribers to use the Prescription Monitoring Program for first time opioid prescriptions to each patients went into effect January 2018. Evaluation of its impact on CountyCare members planned.
